## NEW - SMART FABRIC!

For the first time in Australia, the latest German designed and manufactured printable fabric is available. This "smart" fabric has unique qualities ...

### 100% UV Blockout

Ideal for use under the harsh Australian sun. All harmful UV rays are blocked, making "Smart Fabric" ideal for awnings, canopies and umbrellas.

### Dirt Repellent

The weave of this fabric has been designed to possess an electrostatic property that actually reduces dirt's ability to adhere to the fabric. This makes "Smart Fabric" terrific for outdoor applications or high traffic environments like shopping centres.

### Fire Retardant

The synthetic polymers are designed to resist flame and prevent spread of fire. "Smart Fabric" is ideal for use in outdoor café situations where an awning may be in close proximity to gas or mushroom heaters.

### Ink Compatibility

"Smart Fabric's" formulation makes it chemically compatible with almost every brand of large format printer and ink. Call your supplier for more information
